

AMAZING! Broad Spectrum Disinfectant Nokout eliminates odors that may be attributed to illness.

(short & long term problems.)

Sickroom smells, the odors of a temporary or longstanding disease are offensive to the caregiver, and can contribute to the depression of persons who experience long term illness. These odors can be completely and safely removed using NOK-OUT giving both the individual who is ill, and the person caring for him/her a better quality of life. Even a short-term illnesses may present problems of odor and contamination for family and friends. Nok-Out rescues people from this dilemma with an EPA Registered, safe, biodegradable, fragrance free and non-toxic Broad Spectrum Disinfectant, that resolves a variety of odor, mold or mildew, disinfection and sanitation issues. Nok-Out is gentle to fragile skin, will not sting, but will kill germs and fungus associated with bedsores and other skin problems. Nok-Out is the answer to problems of contamination and/or odor in every instance of illness. People living through difficult medical situations may require the use of a powerful, effective, but totally safe product to eliminate odors associated with cancer, ostomies, incontinence, cauterization, vomit, human body secretions, and other difficult to remove odor problems. ***Nok-Out is the answer to these concerns, for the person who is ill, the caregiver, and for all family members.***

Procedures for using Nok-Out in health care settings

Use the handy battery operated sprayer whenever airborne odors are a problem. The sprayer fits on top of a gallon jug or 32 oz. Trigger Sprayer. Use Nok-Out liberally to sweep clean all bad odors from the air. If extra humidity is needed in the room, a vaporizer may be used containing 8 oz. of Nok-Out with one gallon of water, running for up to 4 hours at a time. Nok-Out is EPA Registered to remove odors upon contact, and to disinfect every time it is used.

Persons with an Ostomy may use Nok-Out by adding 1 oz. to the bag for highly effective odor elimination with no toxic side effects, but with powerful disinfecting attributes.

Where body braces or prostheses are being used, Nok-Out may be sprayed directly on the appliance, or on the body to remove common odors associated with close contact to the body. Regular cleaning of other medical appliances such as a C-PAP are recommended by nurses and medical tech staff. They may be cleaned and disinfected with Nok-Out, providing a sweet smelling and totally clean appliance, one which will not allow mold & mildew spores to grow.

Wheelchairs are often the source of body odors, and are difficult to remove. Spray the

seat, armrest, back, and bottom of the chair for best results. Allow the wheelchair to air dry. There is a residual effect when using Nok-Out. If an accident occurs, odor elimination is still effective.

Spray Nok-Out around urinals and toilets, and allow to air dry for long-lasting odor removal. A daily spray will remove all offensive odors completely.

When changing bed linens, apply Nok-Out to soiled sheets before putting them into a linen hamper. This will inhibit odor production. Before placing clean sheets on the bed, spray Nok-Out on the mattress cover, or egg crate protector, and allow to dry for a few minutes. You will find a residual protection in this method.

If a person is allergic to laundry soap, adding 4 oz. of Nok-Out for every 20 gallons of water in the washer can eliminate the soap enzyme. Patients allergic to deodorants can use Nok-Out to eliminate body odors.

Smelly mattresses and mattress pads may be rescued from body secretion odors.

Long-standing odors may pose a more difficult application procedure but once NOK-OUT gets on the SOURCE of the problem, it is gone.

Sponge or spray NOK-OUT directly on bed sores or other suppurating wounds soothes at the site. NOK-OUT will destroy bacteria that cause mal-odors and which allow recommended salves and ointments to be more effective. Nok-Out is EPA registered to be safe to apply even to fragile, delicate skin.

The air in a room where chronic illnesses are present can be restored daily to a fresh, fragrance free environment with a quick misting spray of NOK-OUT.
